Open Access is not always easy to define in some subject and discipline areas. Exhibitions that constitute, or partly constitute, the publication of art- or design-based research can be considered Open Access if they are presented in public institutions, and announced accordingly. However, they are not accessible for (research) audiences without physical proximity to the presentations/exhibitions. This has to be accounted for as documentation of the event, and this can be made public and openly accessible in wider contexts, and electronically distributed.
