# Kohei Tateyama

**Computer Engineer** 

# Education

**Q** 2019 - 2023

Keio University, Yokohama, Japan

#### **B.S. in Information and Computer Engineering**

2023 - 2025 (Expected)

University of Genoa, Genoa, Italy

M.S. in Robotics Engineering

**O** 2023 - 2025 (Expected)

### Keio University, Yokohama, Japan

#### M.S. in Computer Engineering

Currently pursuing a double degree in Robotics Engineering and Computer Science through the Joint European Master in Advanced Robotics (JEMARO) at Keio University and University of Genoa.

### **Research Experiences**

#### 2022 - 2023

Isogawa Lab, Keio University

#### Event-Based Vision and Deep Learning Approaches for Human Gaze Tracking

Attained remarkable enhancements in gaze tracking precision, surpassing benchmarks set by prior studies. Achieved through the implementation of deep learning algorithms and an event-driven approach.

#### 2023 - 2024

ACM/IEEE International Conference on Human-Robot Interaction, Colorado, USA

#### PosChair: Promoting productivity and health in every seat

Designed PosChair, a human-interactive chair, aimed at combatting sedentary behavior and enhancing user health. Showcased the project at the ACM/IEEE International Conference for Human Robot Interaction 2024.

### Extracurricular projects

#### 2021-2022 (6 months)

#### **Unity Bands for Healthcare Warriors**

Designed and sold 2000+ wristbands during the COVID-19 peak, directing all proceeds to support healthcare workers. Demonstrated commitment to making a positive impact in challenging times.

#### 2021-2022 (3 months)

#### App development using SwiftUI

Developed an iPhone game that simulates asset building, investment strategies, business growth, and passive income generation. Implemented the game using SwiftUI for user interface design, and utilized MATLAB for point systems and other calculations.

#### 2024

### Gran Canaria, Las Palmas

#### Smart Green Island Makeathon 2024

Participated in Makeathon 2024, collaborating with B&R to tackle battery waste. Led an international robotics team, employing Delta robots to sort batteries based on remaining capacity, optimizing efficiency for other teams.
