

*Descrizione  
dell'azienda/  
Perché lavorare con  
Noi?*

We are among the world's top three manufacturers of plants and machines for the metals industry.

The Group's companies use their own technologies to manufacture and install competitive machines and plants worldwide, supplying both single units and turnkey plants.

Our current range of products includes machines, plants and processes for all the production cycles of steel and non-ferrous metals, from ore and scrap processing to finished long and flat products.

Motivated by ambition to deliver the best results and driven by our core values and mission we set the course for continuous improvement and success.

We are the reliable innovative team that, together with our customers, shapes the way of the metal business development
