breve descrizione aziendale

Gedec is a design house specializing in advanced electronic and microelectronics design, development, and technology services.

ASIC/ASSP design and development from specifications to fab tape-out.

Complex IPs schematic and layout development and design

perché scegliere noi

GEDEC's extensive skills in analog design allows it to meet needs with high expectations thanks to more than twenty years experience in ICs design for different application fields such as Mobile and Automotive

corsi di studio di maggiore interesse

Microelectronics

Analog and Digital design

posizioni aperte e relativi percorsi di inserimento

Analog and mixed-mode design engineers
