Hello!

I am Boyu Chen, from China. I am a master's student at the University of Genoa. My current research interests are in posthumanism and design ontology.

For a long time, anthropocentrism has been the totem of the world, and The human ego has always been seen as the controller of the world, constantly consuming resources. But in the post-anthropocentric era, we need to recognize that our species is just an ordinary citizen of the ecosphere and that we should also recognize the intrinsic value of other species and use design, the wisdom of human social progress and the evolution of social relations, to change the perception and build multi-species coexistence.

Education

2021 - 2023

University of Genoa, Italy

Product and event design (110L/110)

2017 - 2021
(double degree)

*Beijing University of Chemistry and
Technology, China*

Industrial design

University of Genoa, Italy

Product and nautical design

Paper

December, 2021

Design interventions and applications of light sources for anxiety and sleep problems in young people (ISSN 1007-1350)

In today's Chinese society, young people are under pressure from many sources and because of this, they experience a strong sense of anxiety. This project aims to devise solutions to solve the problem of 'insomnia caused by anxiety in Chinese youths and improve their night rest as well as sleep quality and sleep status. Based on the sleep situation of young people, the bedside lamp as a light source and the use of fractal theory as the basis for product model design promote optimal sleep condition for young people.

Internship

July - October, 2021

*Zuohe Industrial Company,
Wuhan, China*

Sector of 3D digital

As a modeling intern, I learned the use of Rhino's higher commands, including the use of SUB-D and Grasshopper.

July - October, 2020

*Zuohe Industrial Company,
Wuhan, China*

Sector of 3D digital

As a modeling intern, I learned the contents of Rhino's Advanced Surfaces, including learning Keyshot.
