

Stella Femke Rigo

DESIGNER

I just finished a Master's degree in ecology futures at St. Joost in Den Bosch. I am interested in designing new environmentally sustainable materials. My mission is to build and promote a healthy future for humanity and the planet. My strength lies in combining sustainable materials with design that fits people's needs, in harmony with the Earth. I develop biomaterials and products and offer a new way of learning about the circular economy. All my products follow the principles of the circular economy. Instead of adapting to the current system, I follow the circular economy principles of reuse and collaboration. So knowledge sharing is an important part of my strategy. I believe that designers create beautiful things when they relate to environmental issues and people.

Experience_

- 150h 2017 ___ Curricular internship "Archiup Studio" ___
Assistant at ArchiUp Studio, 3D and 2D design.
